

Drone-in-a-box solution to automate monitoring & data collection

The ecosystem of:

- autonomous drone
- docking station
- AI-powered software

to fully automate monitoring & data collection.
Dronehub replaces hazardous man-hours
by collecting intelligent drone data
in a fully autonomous way.

DRONEHUB

SERVICES

- continuous monitoring
- risk and hazard mapping
- remote inspections
- real time video
- thermal imaging
- perimeter security
- detections
- emergency response
- emergency and scheduled flights

INDUSTRIES

MAIN BENEFITS

- ✓ Speed up the inspection process
- ✓ Integration within one system
- ✓ Generate higher precision data
- ✓ Reducing the need for human labor to a minimum
- ✓ Save time and money

IF DRONES, WHY DRONEHUB?

All-weather hubs

The official IBM partner in
the drone industry

2 mins. battery
exchange

Operates 24/7

World's first
Mobile hub
